Innovation throughout the Data Journey

Welcome to the 2024 edition of the Data Summit Luxembourg

The Data Summit Luxembourg 2024 edition will bring you through the entire data journey, showcasing innovations and solutions to diverse data challenges. The day will include interactive sessions on the main stage and lively encounters in the exhibition area during the networking breaks.

Showcasing a mix of sessions from academia and industry, along interactive discussions and panels, you will get a deep insight into the journey of innovation from data. Each session, will bring you one step forward in the data journey, starting from data collection, preparation and discovery, going through data access and analysis all the way to data visualisation and archiving, through interactive presentations and case studies.

The Data Summit Luxembourg event gathers both local and international participants from the public and private sector. This year, the Data Summit Luxembourg opens its doors also to sponsors and exhibitors. In the Foyer, data enthusiasts can learn the latest developments of data services, while networking with industry professionals and policy makers. In the Plenary Hall, the keynotes and dialogues will showcase the vast potential lying in secondary use of data, when utilising it in the right way and through the right services.

Join us, and be part of the ultimate event to explore, learn, and enable innovation throughout the data journey.

Connecting data experts & enthusiasts
